GMP DOCUMENT CONTROL SOFTWARE

Document Management System (DMS)

The entire document lifecycle with version control, e-signatures, and complete traceability from creation to archival.

OVERVIEW

On paper, document control depends on people remembering to pull back old copies, number new ones, collect signatures and update the master list. GAMP DMS handles those steps in the system. People still write, review and approve; they no longer have to keep track of everything by hand.

WHY TEAMS CHOOSE GAMP DMS

Author from a controlled template

SOPs start from an approved template, and any two revisions can be compared side by side rather than read in parallel.

Know what people actually hold

Controlled issuance of SOPs, batch records and protocols, with transfer and acknowledgement tracked — so the copy in someone's hand is the current one.

Rights that match the role

Transcription managed within the system, and view, edit and approve rights granted by role rather than by convention.

CAPABILITIES

- ✓ Template-based SOP creation
- ✓ Side-by-side document compare
- ✓ Controlled issuance of SOPs, BMR/BPR, protocols
- ✓ Transfer and acknowledgement tracking
- ✓ Transcription management
- ✓ Role-based view, edit, and approve rights

ON THE COMPLIANCEONE PLATFORM

- Single sign-on across modules, managed through one administration layer
- Active Directory integration
- Audit trail, electronic signatures and role-based access
- Cloud, on-premises or hybrid deployment
- Built for 21 CFR Part 11 and EU Annex 11
