GMP TRAINING MANAGEMENT SOFTWARE

Training Management System (TMS)

The complete training lifecycle from induction to certification, with SOP changes triggering retraining automatically.

OVERVIEW

Training records on paper or in spreadsheets tend to fall behind. A new SOP version goes live, the training matrix is not updated, and an inspector later finds an operator working to a procedure they were never trained on. GAMP TMS closes that gap by taking its instructions from DMS: when a document is approved, training on it is assigned to the roles that work to it.

WHY TEAMS CHOOSE GAMP TMS

From induction to competence

Onboarding is digitised and course codes are managed by role and department, so what someone must be trained on follows from what they do.

A document change retrains the people it affects

Training syncs with approved documents automatically. When an SOP changes, the people who work to it are scheduled, and attendance is tracked.

Prove competence, not attendance

Online assessments and on-the-job training signed electronically, so the record shows someone can do the task rather than that they sat in the room.

CAPABILITIES

- ✓ Digitised onboarding and induction
- ✓ Auto-sync with approved documents
- ✓ Course code management by role and department
- ✓ Session scheduling with attendance tracking
- ✓ Online assessments and competency tracking
- ✓ On-the-job training with e-signatures
- ✓ Centralised training records and certificates

ON THE COMPLIANCEONE PLATFORM

- Single sign-on across modules, managed through one administration layer
- Active Directory integration
- Audit trail, electronic signatures and role-based access
- Cloud, on-premises or hybrid deployment
- Built for 21 CFR Part 11 and EU Annex 11
